COMPARISON · 30 M SPRINT

Demo Vaulter 3 vs Demo Athlete vs Demo Vaulter 2

Oct 27, 2026 – Nov 8, 2026
30 runs · 5 sessions

Best top speed	Gap first to last	Most repeatable	Fastest fly 10 m
8.99 m/s Demo Vaulter 3 · Nov 8, 2026	**0.51** m/s Demo Vaulter 2 to Demo Vaulter 3	**Demo Athlete** ±0.11 m/s run to run	**1.13** s Demo Vaulter 3

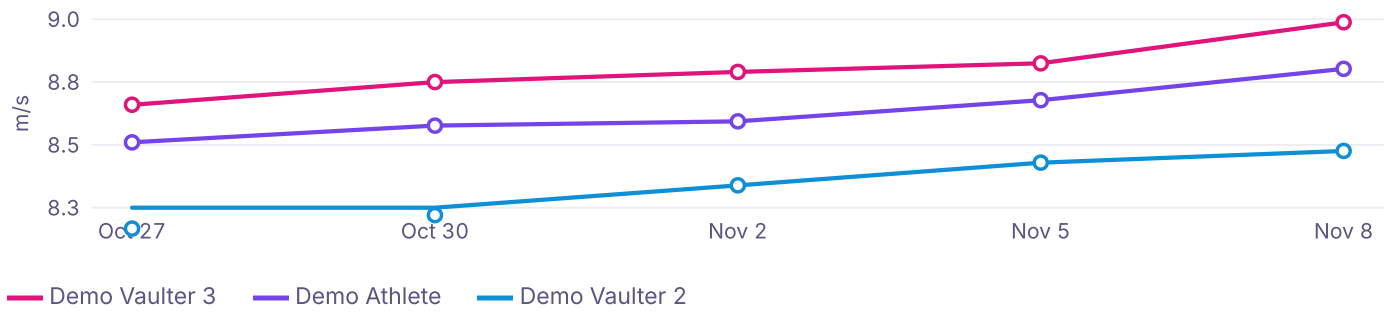

Ranking · best top speed

gap to the leader in m/s

1	**Demo Vaulter 3** 10 runs · avg 8.78 m/s	**8.99** m/s	leader
2	**Demo Athlete** 10 runs · avg 8.62 m/s	**8.80** m/s	−0.19
3	**Demo Vaulter 2** 10 runs · avg 8.30 m/s	**8.48** m/s	−0.51

Best top speed per session

one point per athlete per day

Key takeaways

- **Demo Vaulter 3** has the best top speed: **8.99 m/s** (20.1 mph), 0.19 m/s ahead of Demo Athlete.
- Biggest gain over this period: **Demo Vaulter 3**, +0.33 m/s from first to latest session.
- Most repeatable: **Demo Athlete**, whose top speed varies by only ±0.11 m/s from run to run.
- Fastest flying 10 m: **Demo Vaulter 3** in 1.13 s.

Runs	10	10	10

Best value in each row in pink. Averages use every 30 m sprint run in the period.

Speed from 10 m to the finish · each athlete's best run

Best vs average top speed

The best run shows what each athlete can reach; the average shows what they bring on a normal day. A big gap between them means the top speed isn't repeatable yet.

Step rate and step length

Top speed is rate × length. Athletes reach the same speed in different ways, so compare each athlete against their own numbers over time, not against each other.
